NARRATIVE THERAPY

Stephen Madigan

"Madigan was virtually 'there' from the very beginning of narrative therapy (1986) and was one of its first scholar-practitioners. Within this book, you will be treated to two histories: one relates the foundational ideas of narrative therapy and the other describes Madigan's own versions of these ideas-in-practice, for which he received the American Family Therapy Academy award for Innovation in Family Therapy (2007). The intertwining of these two histories makes for scintillating reading."

—David Epston, MA, cocreator of narrative therapy and coauthor of *Narrative Means to Therapeutic Ends*

Praise for the *Theories of Psychotherapy Series*

"Each book in this series, written by a leader in the field, provides a concise, clear, and informative introduction to a major model of psychotherapy. If you teach psychology or want to keep abreast of this ever-changing field, you will find this series to be a treasure: It is a major publishing milestone."

—Robert L. Leahy, PhD, Director of the American Institute for Cognitive Therapy, New York, NY

NARRATIVE THERAPY

Stephen Madigan

Narrative Therapy provides an introduction to the theory, history, research, and practice of this post-structural approach. First developed by David Epston and Michael White, this therapeutic theory is founded on the idea that people have many interacting narratives that go into making up their sense of who they are, and that the issues they bring to therapy are not restricted to (or located) within the clients themselves, but rather are influenced and shaped by cultural discourses about identity and power.

This essential primer, amply illustrated with case examples featuring diverse clients, is perfect for graduate students studying theories of therapy and counseling, as well as for seasoned practitioners interested in understanding how a narrative therapy approach has evolved and how it might be used in their practice. 2011. 176 pages. Paperback.
